

- **NRAs' view on the main body of the HAR**
 - The HAR broadly reflects the provisions of the FCA GL
 - Some elements still defer:
 - The cap on compensation mentioned as mandatory
 - Specific compensations foreseen in case there is no MC
 - The possibility for the Allocation Platform to change the required rating for bank guarantees at its own discretion
- **Current NRAs' position on progress towards full compliance on firmness**
- 21 out of 33 concerned bidding-zone borders with FCA GL compliant rules*
- Other borders would deviate on some aspects like:
 - The level of the cap
 - Compensation based on the marginal price of initial auction
 - The use of Emergency Situation and LTFD concepts
