

## 1. Review of the Manual of Procedures (MoP)

- **At the time of preparation of this slide ENTSO-E was delayed** in the submission. Latest ENTSO-E's update was that this would take place in early December.
- According to ENTSO-E, the delay is mainly due to TSOs' discussions on **whether and how to report on internal redispatching. It's still unclear whether and how this will be reported.**
- **Depending on the date of submission, ACER's opinion could be ready in February 2017**, following NRA's comments at the AEWG level.

## 2. Data quality

- **On 19 September ACER sent a request to AEWG members for an update** on the actions being taken following the ad-hoc ENTSO-E completeness reports.
- **4 NRAs (CZ, FI, GB, RO) provided feedback** showing that most the issues concerning their respective geographical areas are being addressed. **7 other NRAs (BE, ES, HR, IT, NL, PT, SE) had already provided feedback** during 2016, explaining the actions being taken.
