Additional methodologies to be submitted

Update on submitted methodologies/ proposals

Day-ahead firmness deadline

- Proposal submitted in December 2016
- Day-ahead firmness deadline: 60 minutes before the day-ahead gate closure time

Intraday cross-zonal gate opening and gate closure times

- Proposal submitted in December 2016
- Gate opening time: common timing proposed at 22 CET with flexibility on CCR level allowed
- Gate closure time: 60 minutes before the delivery of the relevant intraday market time unit

Day-ahead and Intraday Scheduled Exchanges Calculation

- Proposal submitted in December 2016
- Methodologies submitted by TSOs who intend to calculate scheduled exchanges

Generation and load data provision methodology

- Methodology approved by All NRAs
- Following this approval TSOs have 2 months to publish relevant information (list of entities, list of data and deadlines) on ENTSO-E website

Forthcoming submissions

Common grid model methodology

- Initial submission in June 2016 (10 months after EiF of CACM)
- Amendment request from NRAs (received in January 2017)
- Methodology has been amended and approved by all TSOs
- The submission to all NRAs to be completed by 11 March 2017

Congestion income distribution

- Initial submission of all TSOs' proposal in August 2016 (12 months after EiF of CACM)
- Amendment request from NRAs (received in February 2017)
- The methodology is currently being amended
- Submission to all NRAs by mid-April 2017 (2 months after amendment request)

Additional methodologies

Intraday capacity pricing

- The proposal will be put to public consultation in April
- Deadline for submission: August 2017

Regional methodologies

- Following the decision on CCRs, the regional proposals will be submitted (capacity calculation methodology, redispatching & countertrading methodology and cost sharing methodology)
- Due to the delay in the CCR decision, not all regions managed to submit the proposal on fallback procedures in December 2016
